Members of the Delphi

After boarding the Delphi, Jorn is reunited with Iris whom he first met in battle in the Gryps War. Joining them are JFK and Ester. The Delphi is fully staffed with a full compliment of crew.

JORN'S "HOME" DELPHI TEAM

IRIS ALLISON

Following a fateful encounter with Jorn, she switched sides and is now the rank of Sergeant in the Federation. Both her and Jorn are 19 years old.

JORN JULIANA

A Sergeant in the Federation. Because of his remarkable resistance to strong G-Forces, he has been assigned to pilot the Gundam Gullinbursti

KTL

The Gundam Gullinbursti's maintenance chief. Also pilots an old model Zaku.

CRISTIAN KIRK

Major in the Earth Federation Forces and Captain of the battleship Delphi. Despite his hardened appearance, he relies on tried and true tactics.

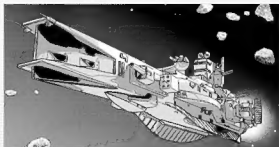

ESTER MCCAMPBELL

Designated Captain of the mobile suit team, Lieutenant Ester was once a member of the Titans and is recognized by and admired for her beauty.

THE DELPHI

Jorn's mothership is the Salamis Kai-Class Delphi. A ship widely used by the Earth Federation Forces in U.C. 0089. It is also a battle-tested ship that survived the final decisive battle in the Gryps War.

when
Jorn arrived.

Defender units

MOBILE SUITS OF THE DELPHI

The Delphi
squadron has
two GM III
Defenders and
the Gundam
Gullinbursti,
each with its
own dedicated
pilots assigned.
With them, an
old model Zaku
is used for
backup.

Former members of the White
Base including Amuro Ray and
Hayato Kobayashi were present.

GM III units were used during the
first Neo Zeon war, and assisted
with other Mobile Suit models.

The Anti-Federation unit that fought alongside the AEUG

Karaba, the
organization Jorn once
belonged to, was an
Anti-Titans unit
that fought alongside
the AEUG during the
Gryps War and the
First Neo Zeon War.
In U.C. 0089,
Karaba was disbanded
and their members
were absorbed back
into the EFF and
reorganized.

WHO WAS KARABA?
